

GSI Arrow™
COMPACT, LIGHTWEIGHT AUDIOMETER

VIASYS™
HEALTHCARE
Excellence For Life

SIMPLE AND SOPHISTICATED

FOLLOWING IN THE GSI TRADITION

Grason-Stadler set the industry standard in clinical audiometers. Now, based on those same principles, the GSI Arrow fills the gap between single channel screening audiometers and the full-featured two-channel systems.

EASY TO USE

- Fast, accurate testing
- Ergonomic keyboard designed to fit all operators comfortably
- Separate channels for tone/speech and masking inputs
- Pure tone signals including steady, pulsed and FM
- Air conduction, bone conduction and speech audiometry are standard
- Narrow-band and speech-weighted masking noise chosen automatically
- Audio input for presentation of recorded materials (tape or CD)
- Store audiometric thresholds during the test
- Automatic threshold test standard

CUSTOMIZE TO YOUR NEEDS

- Choose insert phones and/or TDH39 headphones
- Talk-back microphone
- Sound field available for precise hearing aid demonstrations and fittings

THE RIGHT SOLUTION FOR EVERY OFFICE

GSI Arrow is perfect for your second sound suite or hearing aid fitting office and light enough to carry to your satellite office. With capabilities for pure tone, speech and masking it is sophisticated enough for most clinical requirements. Add on the CD player and sound field package and it is perfect for the hearing instrument dispensing office. For school systems that require more capability than a screening audiometer, the GSI Arrow fits perfectly.

TECHNICAL FEATURES

Choose pure tone or speech testing using live voice or recorded material.

Protect patients from high outputs by choosing +30dB only when needed.

Clear, easy-to-read frequency display.

Transfer data easily to NOAH for fast, easy hearing aid fittings.

Quickly change output transducer: Air, Bone or Speaker.

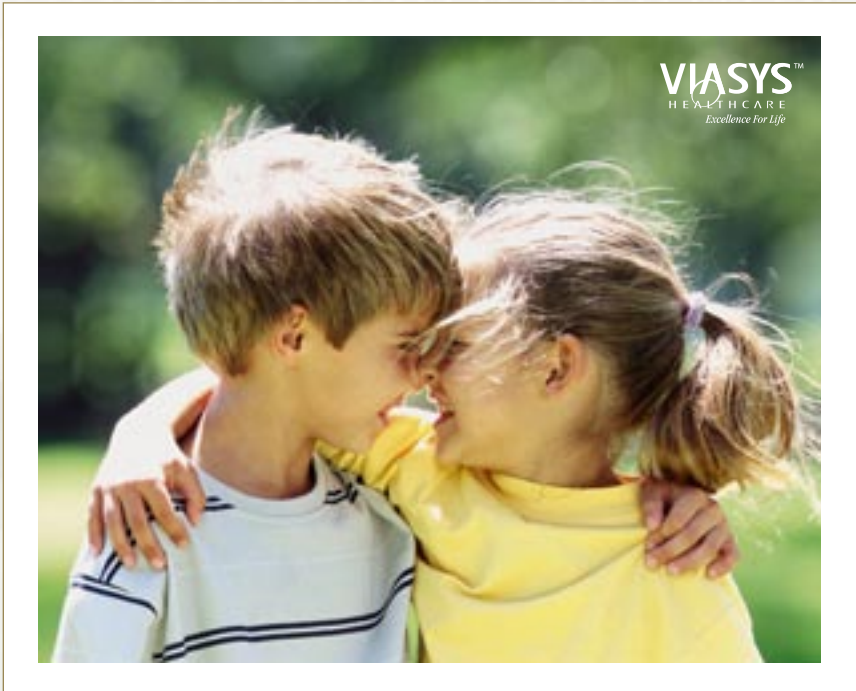

Digital detent attenuators let you "feel" the controls for fast, easy testing.

Record thresholds while testing for data transfer or recall.

A HISTORY OF EXCELLENCE

Speed. Versatility. Quality. Thanks to nearly 50 years of experience in the audiological industry, you can count on Grason-Stadler to deliver all those things and more. Much more. See for yourself why the GSI Arrow is the ideal solution for your clinical and hearing aid dispensing needs. Call us today at (+1) 608-441-2323 or fax us at (+1) 608-441-2324.
